Skinveda LLC

Founder

**August 2013-Present
Plano, TX**

- Researched, Developed and Formulated a *niche* skincare brand using bio-identical compounds found in nature, and modern delivery systems
- **Collaborated with packagers and suppliers in China towards Skinveda's new packaging**
- **Monitored trends in the natural and organic product arena.**
- Developed a unique approach to skincare using the science of psycho-dermatology and Ayurveda where our skin reflects a need for balance in our lives. By identifying our mind-body imbalances, we can determine our skin type.
- **Handled all the business aspects including preparing budgeting, audits, sales forecast, pricing, lab instrument maintenance, product development, presenting ideas, collaborating with buyers, sales and marketing team, and vendors.**
- **Completed market, competitive and internal sales performance reviews to understand product opportunities when re-launching the brand at Indie Beauty Expo in 2017.**
- Started from scratch to build the lab and developed a very successful skincare line that is being sold in Whole Foods, Amazon, online retailers all over the world and in US.
- Did demos and presented research to gain business with buyers from high end retailers

SASA Cosmetics and Consulting LLC
*R&D Director***July 2007- Present**
Plano, TX

- Developed products for several key brands (over 100 products being sold on the shelves currently), do all the R&D, testing, writing marketing sheets, production, labelling, filling and pricing
- Successfully developed foundations and concealers for a famous brand using vegan, cruelty free and non-synthetic alternatives currently sold in spas
- Worked with celebrities and well-known public figures and achieved million-dollar revenue for clients
- Developed high end Swedish brand of foundations to treat scars
- Researched, QC, Stability development, formulation, costing out formulations, packaging of pharmaceutical creams and ointments
- Researched alternatives to synthetic products using green and natural sources of ingredients and compounds
- Presented current product trends and current research to clients at seminars and conferences.
- Created synergistic ointments and a highly successful nutritional supplement for a medical device company that is sold globally in major doctor offices for weight loss
- Prepared marketing brochures and labels using Photoshop, Adobe, Excel.
- Developed pet products for a high-end pet spa including shampoos, conditioners, odor eliminators using patented enzyme technology
- Microbiological testing of raw materials and analysis using GC-MS, HPLC, and FT-IR
- Formulated challenging UV Physical sunscreens, dermatological creams, industrial hand cleansers
- Assisted QC department with quality issues of finished goods and raw materials
- Supervised lab personnel and production staff
- Assisted with writing reports for FDA regulatory affairs
- Managed effectively overall lab and production personnel with suggestions for installing machines for efficient production of water-in-oil cosmetics
- Helped with increasing sales, marketing, reviewing contracts, business plans, and advising new packaging ideas that connect with consumer.
- Reviewed and created Ingredient deck, C of A, MSDS for international clients in China, India and Canada, and reviewed final artwork

Aloe Vera of America
Senior Formulation Scientist**November 2010 – May 2011**
Garland, TX

- Formulated a variety of personal care products, (bath and body products, hair care), cosmetics, OTC's, dietary supplements and beverages.
- Formulated beverages and conducted inspection of Quality control records.
- Conducted training seminars in collaboration with Regulatory and Quality departments.
- Conducted stability work for all the products developed.
- Scaled-up approved formulations to include identification of critical process variables.
- Set product specifications and procedures.
- Wrote batch production records.
- Researched product formulations and properties and interactions of raw materials.
- Researched actively for new raw materials to get the best competitive quote
- Collaborated with Regulatory Affairs on a weekly basis
- Created a log of all experiments and stability data for all R&D projects in the lab notebook.

Goodier Cosmetics

Senior Research Scientist/R&D Manager

June 2009- May 2010

Dallas, TX

- Developed OTCs and cosmetics for physicians, and dermatologists
- Analyzed ingredients and finished products using viscometer, FT-IR, GC-MS
- Synthesized natural products using organic synthesis
- Used wet chemistry techniques
- Provided technical leadership to lab technicians, quality control and Regulatory affairs
- Developed documentation, project reports, maintain lab notebook, present data to R&D director, supervise lab staff and production facility
- Researched new products and ingredients, share and transfer learning to fellow employees, attend seminars and educational symposiums, write technical papers for scientific journals
- Excellent oral and written communication skills applied on a daily basis, project management, stability reports.

Swiss American Labs

Product Development Manager

November 2006-June 2007

Carrollton, Texas

- Developed new products and fixed existing formulas including OTCs, Elta MD line, medical grade products for wound care and skincare products.
- Worked to retain influential clients and was the sole formulator for their projects that brought a huge revenue to the company
- Supervised lab personnel, attended weekly R&D lunch meetings with all managers and directors to discuss status of projects
- Trained lab tech on formulation of cosmetics and conducted testing, review of personnel
- Overlooked compounding
- Prepared Ingredient decks, label documents, regulatory documents
- Collaborated with Sales & Marketing, Regulatory Affairs, QA/QC departments
- Reverse engineered products
- Talked to clients directly to understand their needs and retain customers
- Prepared marketing sheets

CBI Labs

Research & Development Manager

April 2005- November 2006

Ft. Worth, Texas

- Principal formulator for high end clients, researched and developed innovative personal care products including hair care, OTCs, physicians' line, and skin care
